85 Morrow Road, Barrie **705-737-0551**

For over 40 years, Albarrie has developed and manufactured advanced nonwoven technical textiles and engineered felt solutions for demanding applications. Our expertise includes working with high-performance fibers such as aramids (Kevlar®, Nomex®), PBO, and other specialty materials used in applications requiring exceptional heat resistance, durability, acoustic performance, thermal management, and engineered protection. We support critical infrastructure, transportation, advanced manufacturing, aerospace, and defence-related applications where performance and reliability are essential.

Canadian manufacturer of advanced nonwoven materials and specialty engineered textile solutions looking to connect with:

- **Defence & Aerospace Manufacturers**
- **Prime Contractors**
- **OEMs**
- **Tier 1 & 2 Suppliers**
- **Military vehicle & equipment manufacturers**
- **Government procurement & supply chain teams**
- **Defence Procurement Partners**
- **Organizations seeking advanced material solutions**

Current or Near Future Certifications:

ISO 9001 Certified, Vertically Integrated Canadian Manufacturing, Product Development & Prototyping, Custom Engineered Solutions, Canadian Supply Chain Support.

Core Capabilities

- Advanced Nonwoven Technical Textiles
- High-Temperature and Chemical-Resistant Materials
- Specialty Fibre Processing and Engineered Felts
- Custom Material Design, Development and Prototyping
- Secondary Oil Containment Systems
- Industrial Air Filtration Solutions
- High-Temperature Material-Handling Components
- Specialty Textile Converting and Fabrication

Defence & Supply Chain Applications

- Military Vehicle & Equipment Components
- Aerospace & Defence Manufacturing Support
- Thermal & Acoustic Management Solutions
- High-Temperature Material Applications
- Infrastructure & Asset Protection Systems
- Secondary Oil Containment for Critical Defence Infrastructure
- Custom Engineered Textile Components
- Domestic Canadian Supply Chain Support

Defence Readiness

Vertically integrated Canadian manufacturer with over 40 years of experience designing and manufacturing advanced nonwoven materials and engineered textile solutions for critical infrastructure, aerospace, defence, transportation, energy, and other mission-critical applications where reliability and performance are essential.
