Matcor Metal Fabrication is a leading North American manufacturer with more than 1.2 million square feet of manufacturing capacity across Canada and the United States. We provide integrated engineering, metal forming, fabrication, machining, finishing and assembly solutions for OEMs operating in demanding sectors including construction, mining, energy, transportation and industrial markets.

Leveraging advanced manufacturing technologies, strategic material sourcing relationships, and extensive experience producing complex welded and formed assemblies, Matcor supports customers from prototype development through full-rate production.

North American manufacturing partner with 1.2M+ sq.ft. of production capacity seeking strategic relationships with:

Primes **OEMs** **Tier 1 & 2 Suppliers** **Defence Procurement Partners**

Current or Near Future Certifications:

ISO 9001 certified quality management systems, Secure facilities & controlled-access manufacturing environments, Cybersecurity policies & infrastructure, NDA & controlled-information procedures, Employee screening & confidentiality processes, Program management & supply-chain coordination capabilites

Core Capabilities

What we do:

- Design and engineering
- Raw material sourcing
- Metal Stamping
- Profile cutting and bending
- Welding, Paint, Machining, Assembly

Defence & Supply Chain Applications

Where our capabilities could add value:

- R&D, product engineering and prototyping
- Strategic mill direct sourcing relationships for hot rolled coil and heavy plate products
- Manual and robotic welding capabilities

Defence Readiness

Our experience working in the defence & dual use space:

Proven dual-use manufacturing capabilities with established experience supporting complex, high-mix, low-to-high volume production environments. Actively pursuing opportunities within the defence and security sectors while investing in the systems, infrastructure and partnerships required to support long-term defence programs.
